EXPERIENCE

Horizam, Lahore — iOS Developer

JUL 2020 - PRESENT

Learned so much from a great team and by experimenting new things.
Glad to have such a wonderful experience working here.

PROJECTS

LiveWaves — Livestream and Events App

LiveWaves is an all in one tool for content creators that allows users to livestream, post their content with their followers and even create events.

Integrated Red5pro SDK for streaming, Firebase for chat, Alamofire for server requests and redesigned whole app for greater user experience.

Tikl — Social Platform

With TIKL, You can directly share your digital business card, social media and contact information using NFC by simply tapping another person's phone.

Built an amazing app with cool animation and effects. Worked with the new SwiftUI framework along with combine, CoreNFC & Alamofire.

Pick4Delivery — Food Delivery App

Pick4Deliver is a food delivery app for customers to find and order from nearby restaurants.

Worked on Core Data, Payment gateways (Stripe, Paystack, braintree).
Added client side cart handling to enhance user experience..
